

Locations of Different Fence Types
Listed by Deerfield Village Fence Committee
(August, 2019)
Annotated 9/1/2019 with addresses)

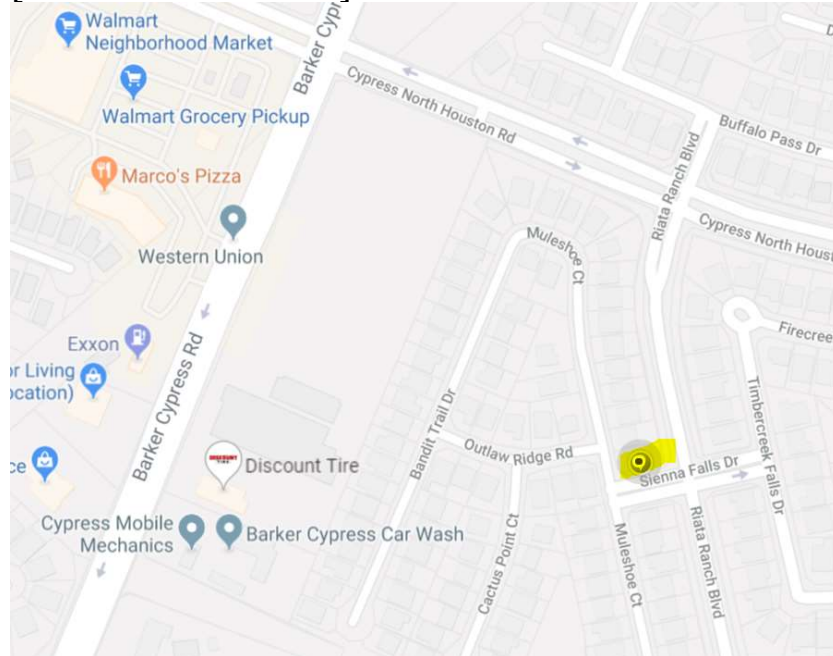

1. Traditional Wood:

- a) Commonly available throughout the area (we'd go with the top rail option and not the dog-eared pickets)

2. Enhanced Wood:

- a) Located on the Riata Ranch property that is best accessed by going north on Barker-Cypress and turning right (east) on Cypress-N. Houston Road. Unfortunately, this fence has been covered with a dark stain since the picture we have was taken, and it does not suit the fence well. It would've been better if they had used a transparent or lighter-colored semi-transparent stain.

[11217 Muleshoe CT]

3. Trex:

- a) Go south on Hwy. 6 past I-10 and then left at 1st light south of Buffalo Bayou to a small office building on the right at 14515 Briarhills Parkway. The Trex fence is at the back of the building along the back edge of the parking lot.

b) Another location of a newer 6 ft. tall Trex fence is in the Waterstone Community located along Morton Ranch road just east of the Grand Parkway (Route 99).

c) Fairly close by, a slightly older Trex Fence can be seen by taking W. Little York east towards Hwy. 6 and turning right at Yorkshire Woods Lane. The Trex Fence begins shortly after making the turn and continues down to the intersection with Catherwood Drive.

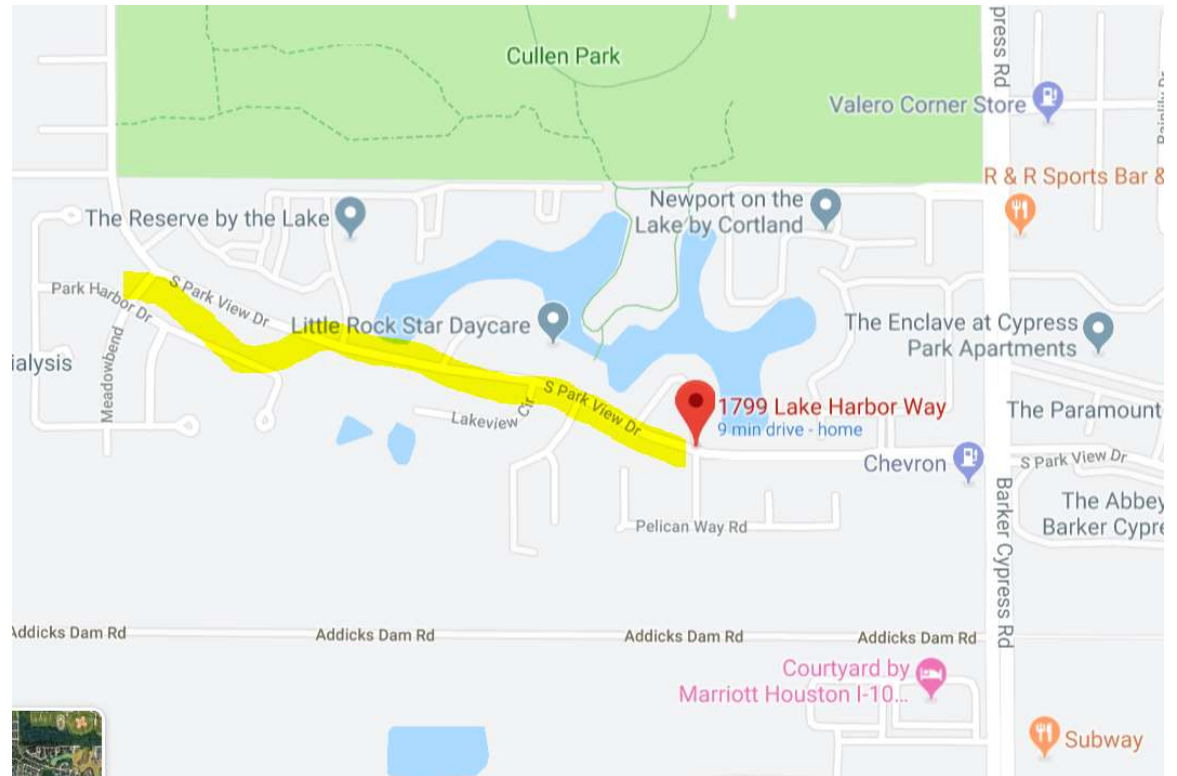

[6003 Crestford Park Ln, Houston, in The Estates of Langham Creek. this property also has a connecting fence to the front of the house that belongs to the homeowner and includes a gate]

4. Poly Composite (Simtek):

a) Go south on Barker-Cypress past Saums Road and take right at light on to S. Park View Drive. Fence begins shortly after making the turn and continues along Park View Drive until around Meadow Bend.

[Lake Harbor Neighborhood 1799 Lake Harbor Way, 77084]

5. Precast:

- a) Take Fry Road north and then, shortly past N. Bridgelands Parkway at Cypress Ranch High School, you'll see the precast fence on the west side of Fry Road bordering the Blackhorse Ranch subdivision up to a little past Meadow Lodge Lane.
- b) A little closer by, take Queenston north to a little past Route 529, and the precast fence will be seen on the right from just south of Summer Dew to just north of Silver Sky.

6. Single Wythe Brick Wall:

- a) Examples of the single wythe brick wall can be seen along Queenston near Longenbaugh and also along Queenston from Window Rock north & west for a good distance.

7. FenceTrak (both Cedar and PVC):

- a) This is a small new company headquartered in Tulsa, OK, and they don't have any fences installed in this general area yet. However, the Fence Committee does have a sample.
