Webinar ID: 815 3727 8705

- I. Introductions (WHCRWA team, DVCA Board, MUD #136 Board)
- II. Question & Answers discussion points:
 - The purpose of the surface water project.
 - Timing of construction, including potential infrastructure, water and sewer pipeline, and street outages. Including communication with HCMUD 136 and the Deerfield Village Community Association during periods when information regarding outages must be disseminated quickly.
 - Plans for safeguarding the site and re-routing vehicular and pedestrian traffic during construction.
 - Demolition and replacement of facilities, sidewalk, landscaping, amenities, and trees, fencing, and restoration plans.
 - Possible temporary and permanent interruption of sheet flow off properties adjacent to the pipeline trench.
 - Plans for monitoring and follow up due to issues with construction, not limited to faulty construction, settlement, poor grading, and inadequate landscaping.
 - Plans for lighting and security of construction areas during the project and staging of construction materials and equipment before and during the project.
 - Contact information for construction administration, including phone numbers, emails, and website.
 - Any environmental factors related to construction not heretofore discussed.
- III. Resident/other inquiries.
- IV. Adjournment
